During this meeting, we will discuss three broad themes, i.e. studying the effects, the working factors, and the perspectives of clients and other professionals. These themes are the main parts of the research agenda in the Netherlands on arts therapies and psychomotor therapy. After that, we will end with a discussion on future directions for arts therapeutic research. I would like to suggest to discuss each theme for 60-75 minutes and I would like to ask each member to reflect in 5-8 minutes on one of the themes. This reflection may consist of elements of your own research, one of your studies, critical notes concerning the theme or methodological considerations; whatever suits you best and would inspire the other members. It is possible to use PowerPoint, because a beamer and laptop is available. As you see, I have already linked names to themes. Please let me know -as soon as possible- if you would like to reflect on another theme.
